Dear Healthcare Provider,

Did you know that up to 80% of patients on statin therapy do not achieve their guideline-recommended LDL-C goal¹⁻³, and half would try another statin if given the option^{4,5}?

About ZYPITAMAG (pitavastatin)

ZYPITAMAG is a third-generation statin indicated as an adjunct to diet to reduce LDL-C in adults with primary hyperlipidemia.

- **Efficacy:** Up to 45% reduction in LDL-C with 4 mg^{6,7}
- **Tolerability:** 3.1% rates of myalgia at 4 mg⁷
- **Unique Metabolism:** Primarily bypasses CYP450 family of enzymes which are involved in the metabolism of 70-80% of drugs⁷
- **Reduced Potential** for certain drug-drug interactions
- **Once Daily Dosing:** 2 and 4 mg tablets, taken with or without food
