

# Generic Pradaxa (Dabigatran): An Affordable Alternative to Eliquis®

Eliquis is too expensive? Generic Pradaxa may be an option.

Generic Pradaxa (dabigatran) is a blood thinner (DOAC) that works by blocking the enzyme thrombin to help prevent blood clots from forming.

This helps reduce your risk of dangerous clots that can lead to stroke or other serious problems.

## Who is it for?

Generic Pradaxa is approved for adults to help with:

- Reducing the risk of stroke
- Treating DVT (deep vein thrombosis) and PE (pulmonary embolism)
- Preventing DVT/PE after hip or knee replacement surgery
- Treating and preventing VTE (venous thromboembolism)

## Why consider generic Pradaxa?

Eliquis remains brand-only and can cost \$500–\$600 per month without good coverage. Generic Pradaxa offers a cash-pay option at a fraction of that price, making it easier for patients who pay out of pocket or have high costs.
