marley drug[®]

Your Local Pharmacy Nationwide

Creating a Healthier Pharmacy Experience

Our Goal

To create a healthier pharmacy experience.

Healthier means your patients can get:

- Affordable Medications.
- Access to award winning customer service.
- Less time waiting in line at the pharmacy!

Our Story

We saw a problem with the current pharmacy model and decided to do things differently.

Overworked healthcare staff, inflated prescription prices, and insurance hassles were harming patient outcomes.

In 2020, our company – Medicare – a drug manufacturer, purchased Marley Drug, a pharmacy licensed to ship medications to all 50 states. Why? To make our branded medication, ZYPITAMAG (pitavastatin), more accessible, affordable, and available to all patients — here's how we did it.

By bypassing insurance companies, pharmacy benefit managers, and wholesalers, we were able to offer branded ZYPITAMAG for \$34.50/month – this is compared to >\$200 through the traditional supply chain route. The point that might surprise you – selling directly to patients was MORE profitable for our company than at \$200 through the traditional route.

This Direct-to-Patient model has caught on and we've partnered with more brands to offer exclusive branded medications and low-cost generics to those who need them.

What Makes Marley Drug Different?

Cost

Marley Drug prices its medications differently than other pharmacies. We offer the same safe and efficacious FDA-approved medications, but sell them at a **'wholesale price'**, which directly reflects the price we paid for the medications.

We focus on cash instead of insurance. If your patients copay is more than \$6, we can save your patients money—every dollar counts.

Convenience

At Marley Drug, customers receive their medications without having to leave their home. Average delivery time is less than 2 days. Customers can fill their medications online, over the phone, and through our app.

Customer Service

Marley Drug's experienced US in-house customer support team and pharmacists are always there to help. Unlike other online pharmacies with long wait times and little customer service. We are here to help. **When you call—we answer!**

Our Pharmacists

Deepti Pidakala, PharmD
Jon Villanova, RPh
Chris Holler, PharmD

Branded Medication Solutions

Through our Direct-to-Patient model, we offer certain branded medications as a cash-price.

- No prior authorizations
- No insurance required
- Free shipping nationwide

Why are our prices so low?

We have formed partnerships with various manufacturers to **improve access to branded medications at a low cost**. Through these agreements we can offer branded medications at a much lower price by bypassing wholesalers and insurance middlemen (which contribute to the high cost of medications).

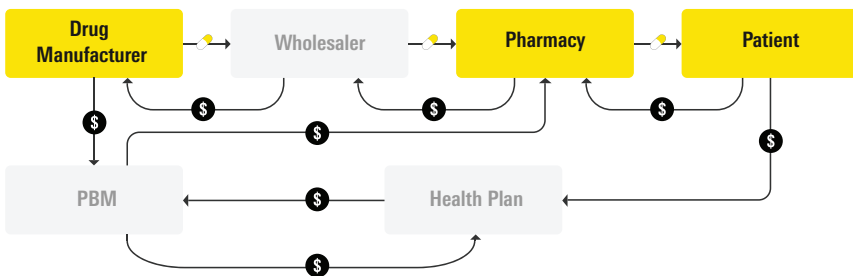

What does this mean for your patients?

All patients have access to the same medications at the same pricing allowing every patient to take control of their health and save money on their prescription medications regardless of their insurance status.

What does this mean for you?

Less time wasted by your staff trying to get prior authorizations approved. Due to Marley Drug's direct-to-patient cash model no prior authorizations or step-therapy is required.

Marley Drug's Model

Zypitamag[®]

(pitavastatin) tablets

Dosages: 2 and 4mg tablet
Administration: Once daily, with or without food

\$34⁵⁰
 /month (\$1¹⁵/day)

Pharmaceutical alternative to
 LIVALO (pitavastatin) tablets.

About ZYPITAMAG

ZYPITAMAG (pitavastatin), a next-generation statin, has a reduced potential for interactions with foods and many commonly prescribed medications. ZYPITAMAG is an FDA approved pharmaceutical alternative to LIVALO. The FDA has deemed ZYPITAMAG and LIVALO to be bioequivalent.

Patients who may benefit

Struggling to afford Livalo | Difficulty tolerating statins | On multiple medications

Brenzavvy® (bexagliflozin)

Dosages: 20mg tablet
Administration: Take in morning,
once daily, with or without food

\$59⁹⁵
30 TABLETS

SGLT-2 inhibitor for Type 2 Diabetes

Brand Name	Generic Name	Retail Cost
Jardiance	Empagliflozin	\$579 – \$713
Farxiga	Dapagliflozin	\$552 – \$679
Invokana	Canagliflozin	\$582 – \$722
Brenzavvy	Bexagliflozin	\$59⁹⁵ (Through Marley Drug)

About BRENZAVVY

BRENZAVVY (bexagliflozin), an SGLT2 inhibitor was FDA approved in January of 2023. BRENZAVVY, when coupled with a well-balanced diet and regular exercise, can significantly enhance glycemic control and A1C levels in adults with type 2 diabetes. BRENZAVVY is not recommended for reducing blood sugar in patients with type 1 diabetes.

Patients who may benefit

Unable to afford brand SGLT2 inhibitors | Metformin therapy alone not enough

GENERIC SITAGLIPTIN

85% Less than the Brand Option

\$80
30 TABLETS

Dosages: 25, 50, 100mg tablet
Administration: Once daily, with or without food

Please note, Generic Sitagliptin is not available at other pharmacies

Medication	Brand or Generic	Retail Cost
Sitagliptin	Brand	\$564 – \$765
Linagliptin	Brand	\$558 – \$691
Sitagliptin	Generic	\$80 (Marley Drug)

About GENERIC SITAGLIPTIN

DPP-4 inhibitors, like sitagliptin, have become an important treatment option for those managing type 2 diabetes. However, medication costs of over \$600 without insurance often leave your patients with high co-pays and at risk of entering the Medicare donut hole. In 2023, Zydus Pharmaceuticals received approval from the FDA for ZITUVIO (sitagliptin) tablets. Zydus Pharmaceuticals authorized a generic for ZITUVIO for sale exclusively through Marley Drug as a low cash-price by bypassing wholesalers and insurance middlemen.

Patients who may benefit

Unable to afford brand DPP-4 inhibitors | On Metformin but not achieving A1C goals

LODOCO[®] (colchicine) tablets

Dosages: 0.5mg tablet
Administration: Once daily, with or without food

\$99
/month

First Anti-inflammatory Cardioprotective Treatment

About LODOCO

In 2023, LODOCO (low-dose colchicine) became the first approved anti-inflammatory treatment that lowers the risk of cardiac events. It's designed for those who already have heart disease or are at a high risk of suffering a heart attack. Clinical trials have demonstrated that LODOCO can reduce the risk of heart issues by 31% compared to a placebo. This benefit comes from adding it to your usual heart care routine, which may include high-intensity statins.

Patients who may benefit

Established ASCVD | Multiple risk factors and at high risk of ASCVD event

Euthyrox[®]

(levothyroxine sodium tablets, USP)

Dosages: 25, 50, 75, 88, 100, 112, 125, 137, 150, 175, 200 mcg tablet
Administration: Once daily, on an empty stomach, 30-60mins before breakfast

\$7 /month when ordering a year's supply

Blister packaging ensures consistent potency in every dose

About EUTHYROX

Levothyroxine, a synthetic hormone to treat hypothyroidism, has a potency that can be significantly affected by external factors such as light, oxygen, and moisture. EUTHYROX comes in blister packaging, specifically designed to shield the medication from light, oxygen, maintaining its potency until consumption. In contrast, generic levothyroxine stored in traditional bottles may not provide the same level of protection, with studies indicating that its effectiveness can decline within 30 days. EUTHYROX tablets are carefully formulated without dyes, lactose or gluten to minimize the risk for adverse reactions in patients with sensitivities.

Patients who may benefit

Sensitivity to generic Levothyroxine | Overpaying for other brand Levothyroxine

Savings on Dermatology Products

Dermatology products often falls into the lifestyle segment under insurance plans which means high co-pays or no coverage at all.

We offer great cash prices on all our products including dermatology.

No prior authorizations | No step therapy | No insurance required

Marley Drug's Wholesale Price List

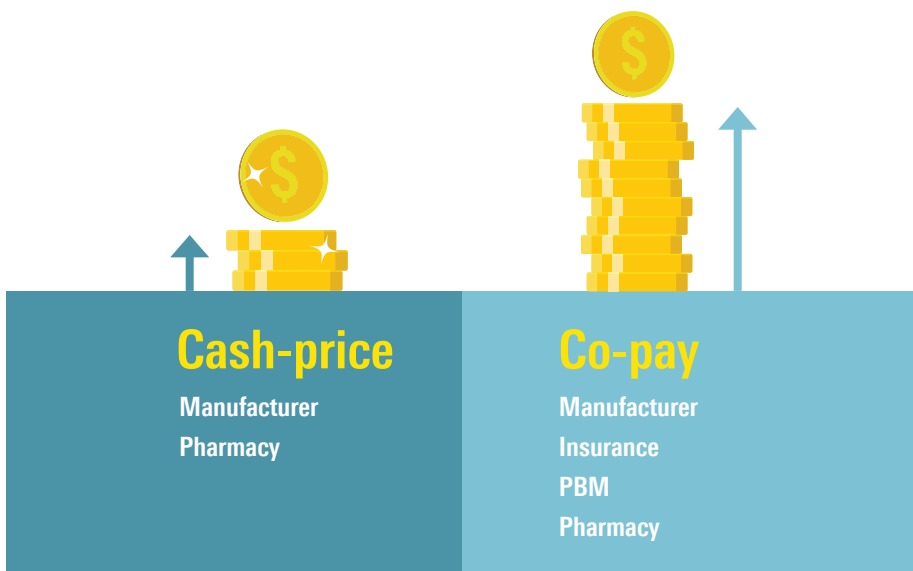

Our Wholesale Price List provides many popular FDA-approved generic medications for a fixed price without the hassle of insurance or unexpected fees.

Benefits Include:

- Fewer pharmacy visits
- Free shipping
- Ensure your patients have a constant supply of medications

Did you know the average co-pay for generic medications is \$10/month?

This pricing is decided by supply chain middlemen who 'negotiate' better pricing for medications (for a fee). These fees often cost more than the medication itself and drive up the cost of medications.

Encourage your patients to check for the cash price for their medication. They will be shocked to learn that paying cash is often less expensive than using insurance. Through Marley Drug's e-commerce site, patients are able to have price transparency and look for the best price for their medications!

Our Wholesale Price List offers over 150 medications!
