

Save time and money through Marley Drug's Wholesale Price List:

Despite the anticipated low cost of generic medications, patients pay an average co-pay of \$10 per month. Check the cash price before using your insurance. It might be lower than your co-pay.

Marley Drug's Wholesale Price List

100+ generic medications for an affordable cash-price of \$37 for a 6-month supply and \$70 for a 12-month supply. This includes free shipping and there is no insurance involved.

Why Longer Supply?

- Lower costs
- Fewer pharmacy visits
- Ensures you have a steady supply of your medications

Why pay cash for your medications?

You will be **shocked** to learn that paying cash is often less expensive than using your insurance. Why? Insurance companies pay Pharmacy Benefit Managers (PBMs) to decide what medications your plan covers. For this service PBMs charge a hidden fee which can significantly markup your medications. You can avoid these fees (and save money) by paying cash for your medications.

Marley Drug's Wholesale Price List includes many popular generics.
